# **Graduate Nursing Program Graduate Student Forms**

2020-2021

These forms are intended to accompany the Graduate Nursing Student Handbook (Handbook) to provide guidance, grading forms, and direction for students accepted or enrolled in the College of Nursing at Tusculum University. The material herein is subject to change and the contents herein are not intended and should not be construed to form a contract. These forms are supplementary to the guidance provided in the Graduate Nursing Student Handbook which augments but does not replace the Tusculum University Student Handbook.

#### MEDICAL RECORDS RELEASE CONSENT FORM

Tusculum University Graduate Nursing Program is required to keep certain medical records on students with potential occupational exposure to human blood. The medical records include hepatitis B vaccination status and medical records after an exposure to human blood. This release form when signed by the Tusculum University Graduate Nursing student authorizes the health care provider to give Tusculum University medical records as required by the OSHA Blood borne Pathogen Standard CFR 1910.1030.

#### **GAP ANALYSIS FORM**

Students admitted into the Post Master's Certificate (PMC) track in the Master of Science in Nursing (MSN) program must be a nationally certified advanced practice nurse who is seeking credit for previous course work towards completion of a PMC in a different advanced practice nursing specialty. Certified advanced practice nurses seeking PMC student status must fill out a Gap Analysis Form. The Gap Analysis includes required courses in the student's concentration with a list of completed courses from an official MSN transcript from the previous institution. The courses the student wishes to waive must be described and listed in the Gap Analysis. A syllabus for each course previously taken and submitted for waiver must be presented with the Gap Analysis Form. Analysis of completed coursework and clinical experiences are compared with the program requirements and national nurse practitioner competencies necessary for certification in the concentration for which the student is applying. The PMC student must successfully attain graduate didactic objectives and clinical competencies of the MSN program. The Gap Analysis must be presented and approved before the student begins the MSN program. The Gap Analysis is reviewed and approved by the Assistant Dean of Nursing.

Desired Constant ADM Conference

School	Year	
New Certification Specialty Sought		

**Instructions:** The PMC student candidate who is nationally certified as an advanced practice nurse is seeking credit or waivers of coursework towards completion of a Post-Master's Certificate in another advanced practice nursing specialty.

- **Column 1:** List of Required Courses for standard program of study for preparation in the student's chosen concentration.
- **Column 2:** List of Courses from the student's transcript that satisfy Required Course listed in Column 1. Course lists from the student's transcript that will be used to waive courses from Column 1.
- Column 3: Identified type and clinical hours and experiences needed to meet the required clinical competencies for the student's chosen concentration. The student must meet the clinical course requirements of the program of study using both clinical course previously taken and indicated on the transcript and courses to be completed.
- **Column 4:** List all coursework to be completed for the certificate (all courses from Column 1 not waived). This column, in combination with Column 3, will constitute the student's individualized program of study.

Use the back of the page if necessary

### NURSING SPECIAL TOPICS FORM

Students will use this form for courses in order to complete the requirements for the MSN program.

- All items must be completed by the individuals listed: proposed student, proposed instructor, Concentration Director, and Assistant Dean of Nursing.
- The proposed student must not begin work on a Special Topic course until all approvals are obtained.
- A learning contract must be attached to this form by the proposed instructor.

### IMMUNIZATION INFORMATION/REQUIREMENTS AND CURRENT CDC GUIDELINES

Certain immunizations must be completed prior to beginning the clinical portion of nursing education because of the direct contact students will have with patients. The exception is a documented contraindication or precaution to the vaccine, the student will need a written statement from the health care provider listing the immunization and the reason for exclusion of the immunization. The student may be unable to attend clinical if any immunizations are not current or proof of immunizations are not provided. The appropriate information must be provided and maintained during the entire nursing program by the students' primary care provider (physician, nurse practitioner, or physician's assistant). The following information/guidelines may be changed to reflect the Centers for Disease Control and Prevention (CDC) most current guidelines. These guidelines are found on <a href="https://www.cdc.gov">www.cdc.gov</a>.

Documentation of the following is to be attached to the completed Medical Profile form. All are required unless documentation is provided that the student is unable to comply.

Rubella, Rubeola, and Mumps Immunity Adults born before 1957 generally are considered immune to measles and mumps. For unvaccinated health-care personnel born before 1957 who lack laboratory evidence of measles, mumps, and/or rubella immunity or laboratory confirmation of disease, health-care facilities should consider routinely vaccinating personnel with 2 doses of MMR vaccine at the appropriate interval for measles and mumps or 1 dose of MMR vaccine for rubella. If born in or after 1957, provide proof of immunity by one of the following:

- 1) Documentation of two measles, mumps, and rubella (MMR) vaccines
- 2) Documentation of positive rubella, rubeola, and mumps titers (All 3 titers required)

#### If born before 1957, provide proof of one of the following:

- 1) Documentation of two measles, mumps, and rubella (MMR) vaccine if there is no laboratory evidence of immunity (all 3 titers are required)
- 2) Documentation of positive rubella, rubeola, and mumps titers (All 3 titers required)

### Varicella (chicken pox) Immunity - provide proof of one of the following:

Evidence of immunity to varicella in adults includes one of the following:

- Documentation of 2 doses of varicella vaccine at least 4 weeks apart;
- Laboratory evidence of immunity or laboratory confirmation of disease.

**Tuberculosis** – All students must have a current (within the last 12 months) negative PPD Tuberculin skin test documented **prior to beginning** any nursing coursework and **annually**, **thereafter**. The two-step process TB skin test (takes 1-3 weeks to complete) is recommended if the student has never had a TB skin test. The TB skin test must be read and documented by medical personnel. Each student is responsible for providing documentation of annual TB screenings to the appropriate faculty at his/her campus.

8/1/2020 Page - 8 -

If a student has a positive reaction to the TB skin test, they will be required to provide documentation from the health care provider that appropriate testing and treatment (if indicated), according to the most current guidelines established by the Centers for Disease Control, has been received and the student is considered noncontagious. The student will be required to provide documentation from the healthcare provider stating the student is cleared to provide direct patient care.

**Hepatitis B** – Immunization against Hepatitis B is required for student protection. The student will be at increased risk because of direct contact with patients. The vaccine is administered in a series of three injections at intervals. Students must provide documentation of having started the series of injections before entry into the first NURS course. Once the series is completed, the student must submit documentation of completion of the series.

A titer is recommended to be performed 1-2 months after administration of the last dose of the vaccine series. If the titer is negative, the student should be revaccinated with a 3-dose series, followed by anti-HBs testing 1-2 months after the 3<sup>rd</sup> dose. Persons who do not respond to revaccination should be tested for HBsAg. If HBsAg positive, the person should receive appropriate management according to CDC guidelines. If HBsAg is negative, the person should be considered susceptible to HBV infection; counseled regarding susceptibility, the use of personal protective equipment, precautions to prevent HBV infection, and need for HBIG PEP for any known exposure.

**Tetanus** – Recommendations include a tetanus booster every 10 years. If a previous Tdap booster has not been administered, then a one-time Tdap booster is recommended; thereafter a Td can be administered every 10 years if not needed sooner related to injury. Evidence of tetanus is required.

- Administer a one-time dose of Tdap to adults younger than age 65 years who have not received Tdap previously or for whom vaccine status is unknown to replace one of the 10year Td boosters.
- 2) Tdap can be administered regardless of interval since the most recent tetanus or diphtheriacontaining vaccine.
- 3) Adults with unknown or incomplete history of completing a 3-dose primary vaccination series with Td-containing vaccines should begin or complete a primary vaccination series. Tdap should be substituted for a single dose of Td in the vaccination series with Tdap preferred as the first dose.
- 4) For unvaccinated adults, administer the first 2 doses at least 4 weeks apart and the third dose 6–12 months after the second.
- 5) If incompletely vaccinated (i.e., less than 3 doses), administer remaining doses.

**Influenza** (**flu**) – Transmission of influenza among healthcare workers can lead to infection of patients. Flu shots are required on an annual basis unless a documented contraindication is provided.

I have read the above guidelines regarding immunizations and agree to comply with current guidelines.

#### CONFIDENTIALITY AGREEMENT

As a student in the Tusculum University Graduate Nursing Program, I agree that I will:

- 1. Abide by all Health Insurance Portability and Accountability Act (HIPAA) and HIPAA High-Tech regulations,
- 2. Access and use confidential information from patients, employees and physicians only as necessary to fulfill my obligations as a student,
- 3. Not discuss patient information with or in the presence of those who are not directly involved in patient care,
- 4. Not leave confidential information (written or electronic) in view of those not permitted to see them,
- 5. Removing parts of the medical record from the facility,
- 6. Forward requests for patient information from persons not directly involved in the patient's care to the appropriate or other nursing supervisor,
- 7. Maintain the security of my Tusculum University and Agency identification badges,
- 8. Maintain the security of my computer password,
- 9. Inform my faculty member immediately, if the security of my badge or password has been breached, and
- 10. Return any and all forms of secure identification when my enrollment in the Nursing Program ends.

Print Name:	
Signature:	Date:

#### TUSCULUM UNIVERSITY

#### MASTER OF SCIENCE IN NURSING

### SIMULATION LAB AND STANDARDIZED PATIENT CONFIDENTIALITY AGREEMENT

As a student of the Simulation Lab or working with standardized patients, I understand the significance of confidentiality with respect to information concerning simulated/standardized patients and fellow students. I will uphold the requirements of the Health Insurance Portability and Accountability Act (HIPPA) and any other federal or state laws regarding confidentiality. I agree to report any violations of confidentiality that I become aware of to my facilitator or instructor.

#### I agree to adhere to the following guidelines:

- 1. All patient information is confidential and any inappropriate viewing, discussion, or disclosure of this information is a violation of nursing program policy.
- 2. The simulation lab information is privileged and confidential regardless of format: electronic, written, overheard or observed.
- 3. I may view, use, disclose, or copy information only as it relates to the performance of my educational duties. Any inappropriate viewing, discussion, or disclosure of information is a violation of nursing program policy.
- 4. The simulation lab is a learning environment. All scenarios, regardless of their outcome, should be treated in a professional manner. The student running the scenario should have everyone's respect and attention. Situations simulated in the lab are to be viewed as a learning opportunity and are not to be used for humiliation of fellow students.
- 5. The simulators are to be used with respect and be treated as if they were live patients.
- 6. Betadine, ink pens, food, drinks or other indicated substances are not to be taken near the manikins, since these substances will cause damage to the simulators.

My signature below indicates that I understand and will comply with the above information.

### FAMILY NURSE PRACTITIONER INFORMATION AND SPECIALTY FORMS

#### FAMILY NURSE PRACTITIONER (FNP) CONCENTRATION

Tusculum University's Master of Science in Nursing (MSN) degree program, Family Nurse Practitioner (FNP) concentration, prepares nurses in the advanced practice role as primary health care providers. The FNP concentration gives nurses the skills confidence, and autonomy needed to become a culturally competent FNP in the clinical management of acute and chronic conditions across the lifespan. The program varies in credit hours according to the FNP track pursued. The tracks offered in the FNP concentration are BSN to MSN, Post Master's Certificate (PMC) and the Associate (RN) to MSN tracks. Graduate course work includes 660 clinical hours regardless of the enrolled track. The courses are arranged in order that clinical and didactic courses are taken concurrently. Clinical courses have a 1:4 credit hour to clinical hour ratio.

#### FNP CURRICULUM PLAN

Students may request full-time, part-time, Post Master's Certificate (PMC), or RN to MSN FNP tracks. The BSN to MSN full-time, part-time and the PMC first semester plans will begin in fall. The RN to MSN track first semester plan will begin in spring.

#### **Full-Time Curriculum Plan**

The full-time curriculum plan is an accelerated plan and is provided below. Students who begin the full-time plan and find it is too intense may drop back to part-time with permission from the Chair of Graduate Nursing.

#### **FNP COURSE LOAD**

The minimum load for full-time status as a graduate student is nine (9) credit hours during fall, spring, and summer semesters. Students who wish to take over 12 graduate credits must petition the Assistant Dean of Nursing to receive approval for any proposed overloads.

#### **GRADUATION REQUIREMENTS**

The following requirements must be met for earning the degree:

- 1. Completion of the 40-77 credit hours specified in the approved Program of Study
- 2. Take a certification review course in the last semester prior to graduation. The FNP student is responsible for associated costs/fees for the review course
- 3. Completion of a minimum of 540 clinical hours
- 4. A minimum cumulative Grade Point Average (GPA) of 3.0 (B)
- 5. Meet all University requirements

### FACULTY CLINICAL SITE EVALUATION

Site/Location:		P	none:	
Preceptor Name				
Student Name:				
Evaluation complete	ed by			
Semester: Spring	Summer Fall	Year	_	
Course: NURS552	NURS 563	NURS 573	NURS 583	NURS 593

Instructions: Please check the most appropriate space after each statement regarding the clinical site. Space is provided at the end of the evaluation if you choose to add written comments.

Strongly Disagree (SD); Disagree (D); Agree (A); Strongly Agree (SA); Not Applicable (NA)

In re	ference to the clinical site:	SD	D	A	SA	NA
1.	Adequate space is provided for student to see patients & complete clinical work.					
2.	Adequate time is given to see clients & report to preceptor					
3.	There are sufficient numbers of clients to meet students' learning objectives.					
4.	The types of clients are varied as to age & type of problem or appropriate for the course learning objectives.					
5.	The clinical setting offers a variety of learning experiences.					
6.	Student & preceptor review clients & select those according to the student's learning needs & personal/course objectives.					
7.	Student is given the opportunity to follow-up with clients &/or problems of interest.					
8.	Reports from lab, x-ray & special procedures are accessible to student for review.					
9.	Lab, x-ray & special procedure reports are shared/reviewed with student.					
10.	Support staff are appropriately helpful to student.					
11.	Support staff are accepting of student's role.					
12.	The philosophy of the site is to provide: a) health promotion & disease prevention only					
	b) disease diagnosis & management only					

	c) Both
13.	Professional references (i.e. office/clinical library) are available for student's use.
14.	Client education materials are available to supplement patient's 's learning (i.e. pamphlets, flyers)
15.	Community resources, agencies & other professional disciplines are involved with client care/follow up.
	Describe characteristics of patient/client population of clinical site:
	General Comments:
	<ol> <li>List ways this agency/site provides a good clinical experience for students (i.e. agency/site strengths):</li> </ol>
	2) List areas in which this agency/site needs improvement in order to provide an optimal student experience:
	3) Please list the variety of learning experiences this clinical setting provides (i.e. special procedures, OB, pediatrics concentration, women's health, family health):
	4) Do you recommend this agency/site for other students: YES NO Why or Why not?

Adapted from Advanced Practice Nursing: Curriculum guidelines & Program Standards for Nurse Practitioner Education (NONPF, 1995) Revised 10/15.

STUDENT NA	STUDENT NAME DATE						
CLINICAL SITE					Admin u	se only	
PRECEPTOR	_		S	core:			
Rating	Criteria						
0=not applicable	No opportunity to observe.						
1	Little or no experience; may know important, related co to apply. Needs to observe and/or be closely supervised tentative or may need correction.						
2	Some previous experience and some ability to integrate Psychomotor skills reveal correct technique but may be additional experience and supervision.						
3	Demonstrates growing ability to analyze the clinical situation in the light of previous experience and didactic knowledge. Psychomotor skills are smooth and sure. Able to interpret assessment results/data and plan management of care. Requires minimal supervision for common patient presentations. Meets expectations for level of progression.						ble to al
4	Demonstrates ability to analyze the clinical situation in the light of previous experience and didactic knowledge and to consider holistic context. Psychomotor skills are smooth and sure. Demonstrates good clinical judgment. Requires minimal supervision across a wide array of patient presentations. Seeks consultation as required. Meets or exceeds program outcome level of performance.						smooth across a
5	Exceeds expectations for student clinicians; exhibits consistent ability to synthesize didactic and clinical experiences to perform at a superior level. Demonstrates creative and critical thinking in approach to management of care. Few students achieve this level.						eative and

### Calculating the score for Clinical and Faculty Preceptor Evaluation of Clinical Skills

Definitions								
<b>a</b> = 5 x number of 5s recorded	<b>e</b> = 1 x number of 1s recorded							
<b>b</b> = 4 x number of 4s recorded	<b>n</b> = total number of assessed items							
<b>c</b> = 3 x number of 3s recorded	$\mathbf{x} = \mathbf{a} + \mathbf{b} + \mathbf{c} + \mathbf{d} + \mathbf{e}$							
<b>d</b> = 2 x number of 2s recorded								

**Step One**: Use the assessed items & tally the number of 1, 2, 3, 4, & 5s on each page. Example:

# of assessed items in each column on this page, <i>not</i> a column sum =	 	 9	2	1
" of ussessed from the continue of this puge, were a column sum		_		

**Step Two**: Use the encounter assessed items total row to calculate the sum of each column for the entire encounter. Example:

Total of assessed items, each column, an pages =       50   9   1	Total of assessed items, each column, all pages =				38	9	1
---	---	--	--	--	----	---	---

This row provides you with the number to use to calculate "a, b, c, d, & e" in the above definitions section. The sum of these cells = "n". In the above example n=48.

**Step Three**: Calculate "a, b, c, d, & e". For example:

a = 5x1 = 5	c = 3x38 = 114	e = 0 = 0
b = 4x9 = 36	d = 0 = 0	

**Step Three**: Calculate  $\mathbf{x}$ .  $\mathbf{x}$  is defined as:  $\mathbf{a} + \mathbf{b} + \mathbf{c} + \mathbf{d} + \mathbf{e} = \mathbf{x}$ . Therefore,  $\mathbf{x} = 5+36+114 = 155$ 

**Step Four:** Divide:  $\mathbf{x/n}$  = calculated Likert scale score for the evaluation. Use the chart below to determine the grade to post in Moodle. Always round up the Likert to convert to a % score. Example: 155/48 = 3.22 Likert calculation. The 3.22 Likert = 85% to document in Moodle.

Likert Scale	2	2.125	2.25	2.375	2.5	2.625	2.75	2.875	3	3.125	3.25	3.375	3.5
% Equiv	75	76	77	78	79	80	81	82	83	84	85	86	87
Likert Scale	3.625	3.75	3.875	4	4.125	4.25	4.375	4.5	4.625	4.75	4.875	4.9	5
% Equiv	88	89	90	91	92	93	94	95	96	97	98	99	100

Use this section to calculate today's Evaluation and place the final score on the first page.

		5			4			3			2			1		
Total of assessed items	Χ		+	Χ		+	х		+	Х		+	Х		=	= n
	Ш		+	II		+	II		+	=		+	=		=	= <b>x</b>
															X/	/n=

Score:

### PREPARATION FOR THE PRACTICUM

Goal: Preparation and optimization of clinical learning experiences.

#### Plan:

- 1. The student will complete a *Student Preceptor Agreement* with 3 copies. Student retains a copy, original to the preceptor and copy uploaded to Typhon.
- 2. The student will secure a Preceptor CV Form when the agreement has been established with 2 copies. Student may retain copy for portfolio and one copy uploaded into Typhon.
- 3. The student will complete a *Student Clinical Portfolio with three copies*. Student retains a copy, one to the preceptor, and one to the Instructor.
- 4. Each student should complete a *Self-Evaluation Inventory of Clinical Skills* form with three copies. Student retains one copy, one to the preceptor, and one uploaded to Typhon.
- 5. Each student should read the course objectives & develop a specific set of learning objectives for the practicum experience.
- 6. Each student will re-write the objectives to incorporate peer and instructor feedback as the course progresses.
- 7. Each student will discuss with the preceptor practicum logistics and review the proposed learning objectives and add preceptor generated modifications or suggestions.
- 8. The student will incorporate the preceptor feedback into a final set of objectives. Both the preceptor and the student will sign the refined objectives.
- 9. The self-evaluation inventory and the preceptor evaluation need to be complete by the last day of the student rotation. The student will make three copies of each document, one retained by the student, one to the preceptor, and one uploaded to Typhon.
- 10. The student will meet with the preceptor during the last week of classes to review the practicum experience and to evaluate progress on the learning objectives.

### STUDENT CLINICAL PORTFOLIO

1.	Clinical Experiences						
	Formal clinical experiences:						
	Other clinical experiences:						
2.	Clinical Interests What aspects of primary care do you find most interesting?						
	What aspects of primary care do you find least interesting?						
	What are your career interests?						
3.	What are your clinical strengths?						

### STUDENT CLINICAL OBJECTIVES

**Learning Objectives:** Review the course objectives. Then list your most important goals for this clinical experience and specific strategies to meet these goals.

### STUDENT CLINICAL SELF EVALUATION FORM

Name	<b>D</b> ATE
------	--------------

Rating	Criteria
0=not applicable	No opportunity to observe.
1	Little or no experience; may know important, related content, but has not had opportunity to apply. Needs to observe and/or be closely supervised. Psychomotor skills may be tentative or may need correction.
2	Some previous experience and some ability to integrate didactic content with experience. Psychomotor skills reveal correct technique but may be slow or uneven; requires additional experience and supervision.
3	Demonstrates growing ability to analyze the clinical situation in the light of previous experience and didactic knowledge. Psychomotor skills are smooth and sure. Able to interpret assessment results/data and plan management of care. Requires minimal supervision for common patient presentations. Meets expectations for level of progression.
4	Demonstrates ability to analyze the clinical situation in the light of previous experience and didactic knowledge and to consider holistic context. Psychomotor skills are smooth and sure. Demonstrates good clinical judgment. Requires minimal supervision across a wide array of patient presentations. Seeks consultation as required. Meets or exceeds program outcome level of performance.
5	Exceeds expectations for student clinicians; exhibits consistent ability to synthesize didactic and clinical experiences to perform at a superior level. Demonstrates creative and critical thinking in approach to management of care. Few students achieve this level.

### Tusculum University Master of Science in Nursing Family Nurse Practitioner Student/Preceptor Guidelines

#### Introduction

The Tusculum Family Nurse Practitioner (FNP) student comes to your practice with a background in basic nursing practice. The student is expected to expand this knowledge to enable her or him to provide primary care to individuals and families. This clinical practicum should provide a variety of experiences in which the student will acquire necessary primary care skills. The preceptor's responsibility is to provide clinical experiences and guidance for the NP student. You will need to facilitate development of skills necessary to provide primary care to patients with acute, minor, and stable chronic health problems, and to provide health-maintenance care for patients in the population focus of the practicum.

Students will need opportunities to develop skills in each of the following activities with patients in the population focus for the clinical rotation.

- Obtain focused or comprehensive health histories.
- Perform focused or comprehensive physical examinations to include specific assessment procedures.
- Assess developmental and psychosocial needs of patients using standardized protocols/assessment measures.
- Accurately and concisely document history and examination in patient record.
- Distinguish between normal and abnormal findings, recognize variations or normal, formulate clinical diagnostic patterns, and begin to determine differential diagnoses.
- Develop plans of care that include screening and diagnostic tests, medication, patient education, referrals, and follow-up visits using current standards of practice.
- Contribute to professional collaboration, case management, and referral processes.

During each clinical experience, students are expected to interview and examine most assigned patients independently; however, all cases should be staffed with the preceptor. Examples of types of patients to which the student should be assigned during this practicum course are patients with:

- Acute illnesses and conditions
- Chronic illnesses and conditions
- Acute primary care
- Employment physicals.
- Well-adult physicals.
- Neurological functional assessment.
- Diagnosis and treatment of infectious diseases (bacterial, viral, fungal).
- Assessment management and follow-up of stable, chronic disorders, and acute disorders/injuries of:
  - o Musculoskeletal system.
  - Neurological system.

- Endocrine system.
- Cardiovascular systems.
- Respiratory system

Students must comply with HIPPAA standards per clinical agency and Tusculum Graduate Nursing policy. Under no circumstance may records be removed from the agency.

Students will comply with all health documentation and other professional requirements of the clinical agency prior to the start of the clinical experience. For the hours spent at the clinical facility to count they must be directed to direct patient care.

Students must be prepared to work the day(s) and hours of the preceptor, and as agreed upon between the student, the preceptor, and the nursing faculty. Students may have an occasional opportunity to work with and additional practitioner on site. The primary preceptor much be on site during this experience. All preceptors must be approved and credentialed by Tusculum prior to supervision.

Students must maintain a clinical log per course syllabi. Tusculum uses TYPHON, an online tracking system, for student to maintain clinical logs. Entries are required with 24 hours of a clinical day.

Students have to attend all scheduled clinical days or notify the supervising clinical faculty and clinical preceptor if an absence is necessary. Any missed time must have arrangements for make-up.

Students must collaborate with clinical preceptor and clinical supervising faculty to develop specific learning goals for the clinical experience.

Students must demonstrate to the preceptor competence of specific skill(s) prior to performing them alone.

Student maintain the student FNP role. At no time is the student to assume a fully independent role in seeing patients without appropriate collaboration and reporting to the preceptor per the course syllabi.

Students must arrange the appointment time with the supervising clinical faculty for the site visit and ensure the preceptor is aware of the visit. However, if a problem is identified or for any reason deemed necessary by the clinical faculty, a site visit may be made at any time announced or unannounced.

#### **Preceptor Guidelines**

- 1. Preceptors will have at least one year of experience as a primary care provider.
- 2. Preceptors must be a licensed provider as a nurse practitioner, medical doctor, or a doctor of osteopathic medicine. Physician Assistants cannot serve as preceptors.
- 3. Preceptors will provide a short Vita or a resume to Tusculum.
- 4. Preceptors will provide contact information for the current practice site to the student and clinical faculty.
- 5. Preceptors will sign the Preceptor Agreements and return to the Clinical Coordinator.
- 6. Preceptors may contact Tusculum Graduate Nursing any time during the period of student supervision. Student will provide the contact information of the faculty preceptor.

#### **Preceptor Role in Supervising the FNP Student**

Clinical experiences are an essential component of the education of FNP students, and preceptors and clinical faculty play an indispensable role in the success of these experiences. Clinical instructions necessitate both supervisory and evaluative activities. Preceptors provide direct clinical supervision, while the clinical supervising faculty provides direct and/or indirect clinical supervision. FNP students are expected to participate in hands on care, shadowing does not provide the necessary experiences the students' needs. Direct faculty supervision occurs when a faculty member is present at the clinical site and is supervising the student in that setting. Indirect faculty supervision occurs when a clinical preceptor is supervising the student while the faculty member retains responsibility for the overall clinical components of the course. As an indirect clinical supervisory the faculty provides oversight of the clinical learning experience and acts, on behalf of Tusculum Graduate Nursing, as a liaison to the clinical site. Students can only count clinical hours that involve direct patient care.

#### **Collaboration with Faculty and Conflict Management**

When a conflict or problem related to the student is identified, the preceptor should collaborate with the clinical faculty so that the proper procedure for management and resolution of the conflict of problem is followed. Any problems related to the faculty role in the preceptor ship experience should be discussed with the clinical faculty and the preceptor. If the faculty and preceptor are unable to achieve a resolution, a clear mechanism for further mediation, including referral to the Assistant Dean of Nursing, should be made with a phone call or an appropriate document.

#### **Student Evaluation**

Preceptors serve as role models, mentors, and directly supervise students in clinical sites and work closely with nursing faculty facilitating student success. An important element of ensuring student success is evaluation of student performance. The clinical preceptor will fill out an evaluation form that is provided to the clinical preceptor by the student. The faculty site visit consists of a clinical evaluation using the same form as the clinical preceptor. The Tusculum Graduate Faculty retains the responsibility for the final evaluation and grade of the student. However, the preceptor evaluation and the information provided to the clinical faculty is vital to the evaluation process.

#### **Procedure for Evaluation of Students**

Preceptors should meet with the student formally at the beginning of the clinical practicum to review the evaluation criteria to ensure expectations and responsibilities of the preceptor and student are understood. During the clinical experience, the preceptor should provide input via the evaluation form.

The evaluation form will be returned to the Tusculum Graduate Nursing program via sealed envelope with the preceptor signature across the seal. The evaluations will be available through Typhon as well.
